

WHAT'S IN A NAME

What's in a name
I ask it so plain
Will someone kindly explain to me
What's in a name

What's in a name
They're just some letters arranged
They all seem the same to me, so tell me'
What's in a name

Does it tell you how I live my life
And does it tell you, all I want to be
Does it tell you how I'd treat my wife
And does it tell you, all you need to know about me

Does it tell you about my hopes and my dreams
And about all the things in this world I fear
Does it tell you, that things are not what they seem
And does it tell you, that you don't want me near

What's in a name
It all seems so strange
More than a little insane to me, so tell me
What's in a name

Instrumental

Would it ease the pain
Would it remove the blame
Would it reduce the shame
Would it release the claim
Would you feel the same
If just somehow we could change
What's in a name

Does it tell you how I live my life
And does it tell you, all I want to be
Does it tell you how I'd treat my wife
And does it tell you, all you need to know about me

Does it tell you about my hopes and my dreams
And about all the things in this world I fear
Does it tell you, that things are not what they seem
And does it tell you, that you don't want me near

What's in a name
It all seems so strange
More than a little goddamn insane to me, so tell me
What's in a name
